

# Bottom Ash Treatment – „State-of-the-art“ in Germany

Prof. Dr.-Ing. Kerstin Kuchta

M Sc. Verena Enzner

8<sup>th</sup> CEWEP Waste-to-Energy Congress 2016

16 June 2016, Rotterdam

# Agenda

- ▶ **Metal in Waste**
- ▶ **Bottom Ashes**
- ▶ **Methods**
- ▶ **Results**
  - **Inputs**
  - **State-of-the-art of bottom ash treatment in Germany**
  - **Metal qualities**
- ▶ **Conclusions**

- ▶ Long tradition in waste incineration: first plant on the European continent  
Hamburg 1896
- ▶ About **24 Mio Mg/a** of waste is **incinerated** in Germany
- ▶ About **5 Mio Mg/a** of **MSWI bottom ashes**
- ▶ Recovery of **metals**
- ▶ Utilization of **mineral material**
- ▶ **Lack of data** on current recovery rates, especially of metals, state-of-the-art

## Metal recovery from bottom ashes from waste incineration – evaluation of the resource efficiency

- ▶ **Resource potential bottom ashes – waste composition**
- ▶ **Resource efficiency state-of-the-art**  
bottom ash treatment and mechanical waste treatment
- ▶ **Estimation of the quality of metals**
- ▶ **Evaluation of the resource efficiency**

EdDE-Dokumentation 17

Entsorgungsgemeinschaft  
der Deutschen  
Entsorgungswirtschaft e.V.

**Metallrückgewinnung aus Rostaschen  
aus Abfallverbrennungsanlagen –  
Bewertung der Ressourceneffizienz**

Dokumentation des Forschungsberichtes

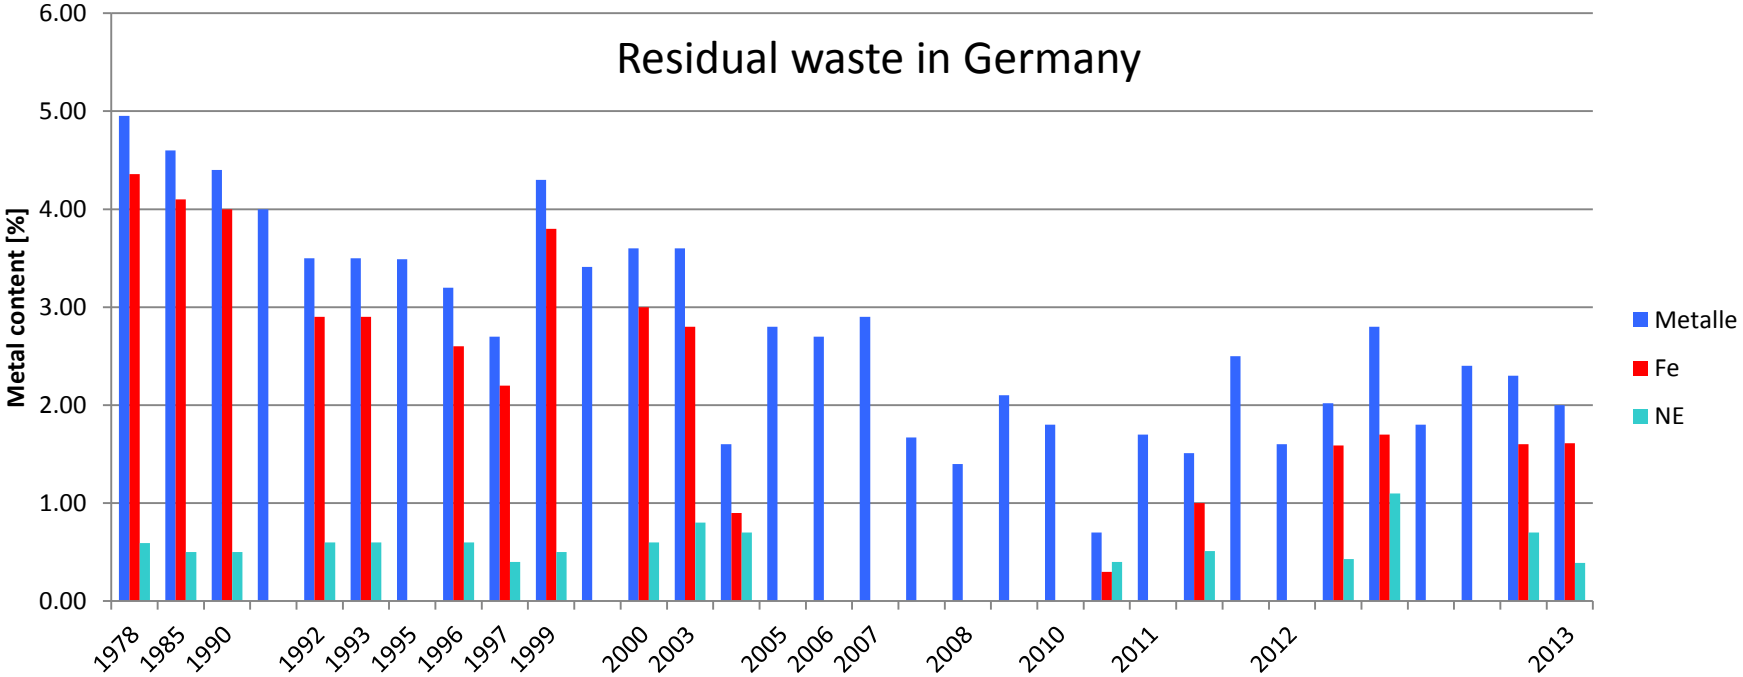

# Climate protection potential

## Metal recovery

Material	kg CO2 Eq/Mg
Iron	945
Copper	2106
Aluminum	9307
Stainless steel	3096
“metal mix BA” (80% Fe, 12% Al, 4% Cu, 4% VA)	2081

# MSW Composition in Europe

MSW Composition of the researched Countries (%)

	A-14	Median	MIN	MAX	$\sigma$
Organic Material	34.1	34.5	23.7	47.7	6.83
Paper and Cardboard	21.8	19.8	11	40	6.93
Plastic	11.5	11.5	1	19	1.05
<b>Metals</b>	<b>3.5</b>	<b>3.25</b>	<b>2</b>	<b>6</b>	<b>1.05</b>
Glass	6	5.8	2.3	11	2.11
Others	23.1	25.85	7	33	8.31

- ▶ Questionnaires to all German bottom ash treatment plants
- ▶ Cooperation with IGAM (German association of bottom treatment plants)
- ▶ Cooperation with ITAD (German association of waste incineration plants)
- ▶ Cross-check possibility
- 24 questionnaires from bottom ash treatment plants
- → 25 answers from incineration plant

**4,2 Mio. Mg**

**Input/ Output**

Betrachtungsjahr (soweit möglich 2014)			
Input Schlacke aus der Verbrennung	Mg/Jahr		Quote #DIV/0!
Abfallinput (falls bekannt) in die Verbrennung	Mg/Jahr		Quote #DIV/0!
Eisen-Output	Mg/Jahr		Quote #DIV/0!
Nichteisen-Output	Mg/Jahr		Quote #DIV/0!
Output mineralische Fraktion	Mg/Jahr		Quote #DIV/0!
Anteil Unverbranntes	Mg/Jahr		Quote #DIV/0!

**Eingangsbedingungen Schlacke**

	Verbrennungsanlage	Verbrennungsart	Abfall	Vorbehandlung
Anlage				
1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Schlackenbearbeitung**

Schlackebetrieb	
Zerkleinerung (z. B. Hammermühle oder Pulvermühle)	
Siebung bis Aufbereitung	
Ferroscheidung	
Wasserschleudung	
Mischschlacke	
Mischschlacke

Mischschlacke	

**Vermarktung**

Aufbereitung der Metallkonzentrate		
Welche Art der Aufbereitung?		
Schrottsorten		
Eisen grob	<input type="checkbox"/>	
Eisen mittel	<input type="checkbox"/>	
Eisen fein	<input type="checkbox"/>	
VA	<input type="checkbox"/>	
Messing	<input type="checkbox"/>	
Kupfer	<input type="checkbox"/>	
Mischmetall verschiedener Körnung	<input type="checkbox"/>	
E-Motoren	<input type="checkbox"/>	
Anderes	<input type="checkbox"/>	
Schutttagung		
Sicherheit der Angabe		

## Aspects of the questionnaire:

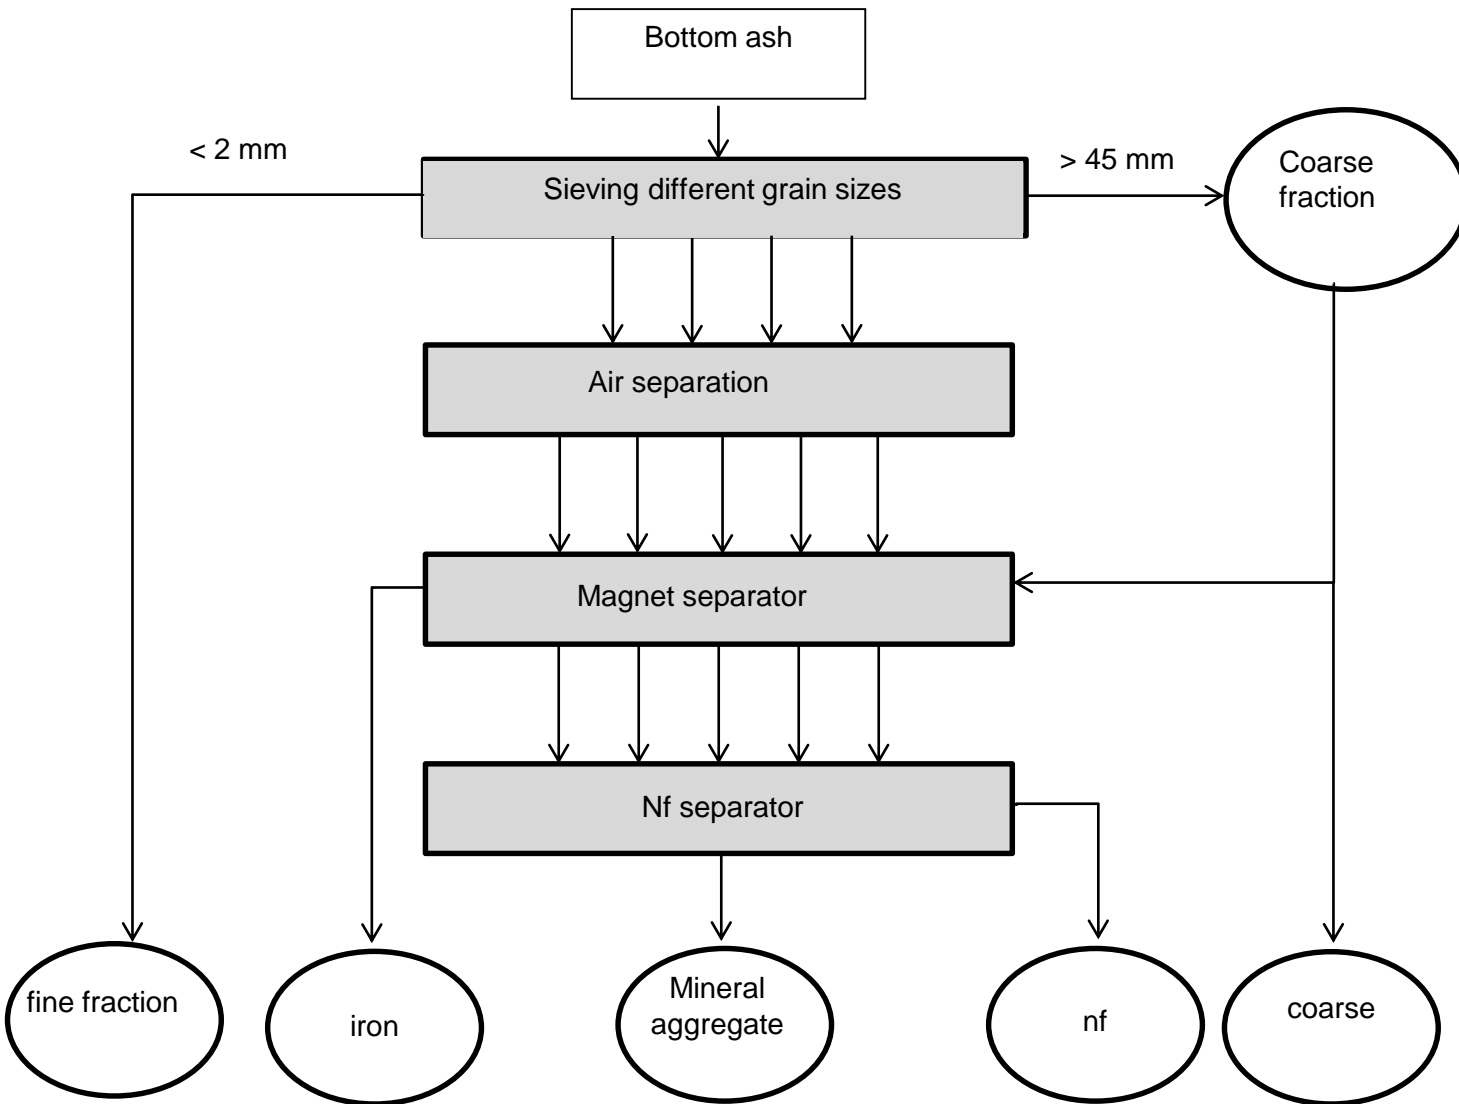

- ▶ Input/ Output
- ▶ Origin of bottom ashes
- ▶ Technique of treatment of bottom ash
- ▶ Quality and characteristics of different metals

Input/ Output			
Betrachtungsjahr (soweit möglich 2014)			
Input Schlacke aus der Verbrennung	Mg/Jahr		
Abfallinput (falls bekannt) in die Verbrennung	Mg/Jahr	Quote	#DIV/0!

Amount of recovered metals based on data from:

- a study for a single plant / a single plant operator
- a study for a number of different plants
- a study referring to the whole country

Calculated based on:

- the **concentration of metals in the MSW**
- the **percentage of recovered metals** from the BA

Actual recovery rates may differ due to:

- No **actual** MSW composition in some cases
- metal recovery data from single treatment plants affecting the representativeness

# Particle Size Treated and Metal Recovery

# Non ferrous metals particle size

- ▶ Advanced technology is applied
- ▶ **Ø 5 magnet separators for 7,7 % iron**
- ▶ **Ø 5 eddy current separators for 1,3 % nf**
- ▶ 89 % remaining as mineral material, 0,9 % organic matter

Thank you for your attention
