

What future for Waste-to-Energy?

Exploring the role of WtE in sustainable modern waste management

Tuesday 24th September, Residence Palace Restaurant, Brussels

[CLICK HERE TO REGISTER!](#)

WHERE: Residence Palace Restaurant,
Rue de la Loi 155, Bruxelles

WHEN: Tuesday 24th September 2019,
18:00

Join the European policymakers, industry and other stakeholders and be the first to learn what future holds for the Waste-to-Energy sector.

On 24th September 2019 the European associations CEWEP and ESWET, representing operators and suppliers of the Waste-to-Energy sector, will present two documents which tackle the future of waste management in Europe and beyond.

CEWEP will present its Waste-to-Energy's Sustainability Roadmap towards 2035 while ESWET will launch its vision of Waste-to-Energy in 2050: clean technologies for sustainable waste management.

The two documents will kick-off a panel discussion on the role of Waste-to-Energy in the future of European environment, energy and climate policies.
